JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 30, No. 4, APRIL 1980

# Subject Index to Volume 30

A posteriori error bounds, 293
A priori error bounds, 293
Adjoint operators, 485
Algorithms, 353
Analogue method, 181
Applied mathematics, 19
Approximation, 535
Approximation techniques, 643

Banach spaces, 117

Combinatorial problems, 423
Command, control, and communication, 89, 309, 589
Conjugate directions, 161
Constrained minimization, 33, 45
Constrained nonlinear programming, 127
Continuous gradient-projection method, 181
Continuous Newton–Raphson method, 181
Control policy, 501
Control theory, 149, 471, 601
Controllability, 601
Constrained nonlinear programming, 127
Convergence, 211, 535
Convergence rates for optimization algorithms, 1
Convex analysis, 149
Convex cones, 117
Convex optimization, 269
Convex processes, 117
Convex programming, 1
Convexity, 211
Cutting planes, 339

Decomposition algorithm, 211
Differential geometric method, 181
Differentiable manifolds, 181
Direct methods, 161
Discontinuous differential equations, 137
Discrete-time systems, 319
Disjunctive constraints, 339
Distributed-parameter problems, 471
Distributed parameter systems, 501
Domination structures, 229
Dual extremum principles, 583
Duality, 149
Duality theory, 583
Dynamic programming, 501

Efficient vector, 523
Energy space, 293
$\epsilon$-equilibrium points, 569
Existence theorems, 19
Extremal construction, 451
Extremals of an element, 485

Feasible direction algorithms, 1
Feedback control, 501, 601
Feedback equation, 131
Filippov solutions, 137
Filtering theory, 583
Fréchet derivatives, 117
Functional analysis, 19, 269

Game theory, 549
Games in normal form, 549
Generalized geometric programming, 149
Generalized inverse, 181
Generalized solutions, 131
Global analysis, 181

0022-3239/80/0400-0693$03.00/0 © 1980 Plenum Publishing Corporation

Hamiltonian function, 501
Heat exchangers, 423
Heat spectrum, 423
Hilbert spaces, 19, 319, 643

Ill-posed problems, 535
Infinite-dimensional spaces, 319
Integer programming, 339
Integral equations, 89
Internal labor markets, 99

Labor hierarchy, 99
Lagrange multiplier rule, 45
Least-squares estimation, 255, 535
Linear optimal control, 319
Linear programming, 523, 643
Linear–quadratic differential games, 383, 569
Linear–quadratic problems, 471
Linear systems, 73, 621
Linearization theorem, 117
Lower-dimensional controls, 663
Lower semicontinuous mappings, 33

Manpower planning, 99
Markov chain, 501
Maximal efficient faces, 353
Maximum principle, 269, 423
Measures, 643
Military cybernetics, 309, 589
Minimal curvature, 45
Minimal-time problem, 635
Minimum effort problem, 485
Minimum expected cost, 89, 309, 589
Mixed strategies, 569
Mosco convergence, 485
Multi-dimensional control systems, 663
Multiple-delay systems, 621
Multiple objective linear programs, 353

*N*-person games, 383
*N*-person quadratic games, 569
Nash equilibrium, 383
Nash equilibrium points, 33
Necessary conditions, 663
Nonconvergence, 535
Nongradient methods, 161
Nonlinear constrained optimization, 181
Nonlinear control, 395
Nonlinear programming, 161, 211
Nonlinear programming problems, 127
Nonlinear simultaneous equations, 181
Nonlinear two-point boundary-value problems, 53
Nonstationary stochastic games, 549
Numerical methods, 161

Open-loop control, 501
Optimal control, 53, 73, 137, 621, 643
Optimal control problems, 269
Optimal decision functions, 89, 309
Optimal decisions, 589
Optimal filters, 583
Optimal inverse pair, 523
Optimal state, 635
Optimal synthesis, 423
Optimal-time function, 635
Optimization software, 127
Optimization techniques, 161

Parallel integration, 53
Parallel minimization algorithms, 53
Parallel processing, 53
Parallel shooting, 53
Parameterized decision-making problems, 229
Parametric representation, 535
Partial differential equations, 663
Perturbation of controls, 395
Perturbation of discount factor, 549
Perturbation of payoffs, 549
Perturbation of transition probability function, 549
Point-to-set maps, 229
Polyhedral annexation, 339
Pursuit–evasion games, 451

Quadratic control problems, 485

Random variable, 501
Recursive algorithms, 255
Reflexive Banach spaces, 383
Reproducing kernels, 255
Riccati equation, 471, 601
Ridge-path methods, 161
Ritz–Trefftz method, 293

SUMT algorithm, 211
Solution maps, 229
Spline approximation, 293
Spline smoothing, 255
Stability, 229
Stability of dynamical systems, 181
Stability of feedback control, 395
Stabilization, 601
Stochastic games, 549
Stochastic optimal control, 99
Strategy, 451
Structure of feedback control, 395
Subgradients, 33
Suboptimal control, 73
System synthesis, 423

Tangent cones, 117
Time-delay systems, 73, 293, 621
Time-lagged control, 99
Time-optimal control, 131
Topological degree, 33

Uniqueness, 635
Upper semicontinuous mappings, 33

Value of a game, 451
Variational perturbations, 635
Vector maximization, 523
